SKILLS

Android Studio Java

Kotlin C++

Git UI/UX

LANGUAGES

Urdu English
Native Fluent

AWARDS

Hack The Space April 2021
Hackathon

Arctic Code Vault July
Contributor 2020
Github

PROJECTS

Notes App

<https://github.com/ShoaibKakil/NotesApp>

(September 2020 - November 2020)

Designed and Developed by myself completely. This App lets users save memories or take notes or todos.

Technologies used:

- Figma
- Android Studio
- MVVM

Onboarding Screens

<https://github.com/ShoaibKakil/onBoardingScreens>

(February 2021 - May 2021)

Onboarding Screens is the best way to introduce your app or give an overview of the app's features and working style.

Key Concepts:

- ViewPager2
- Implement LinearLayout Programmatically

Ad Astra

<https://github.com/ShoaibKakil/AstroHack>

(March 2021 - March 2021)

This was a team Project in **Hack The Space** Hackathon. We successfully positioned among the top 10 teams in a total of 50+ teams. Our Project was declared as the best cosmo Theme Project.

- You can read the purpose and work of this app in the Readme file of this repo.
